

1 B .Caspari (Charleston, USA), Harvard Ellman and Stephen S. Snyder (Los Angeles, USA), and Frank W. Jobe (Inglewood, USA).
 2
 3 – We are deeply respectful and grateful to the wonderful teacher and surgeon Douglas T. Harryman from Seattle who passed at only 49
 4 years of age. Because of him, of his vision, of his example, my life
 5 was changed for good (MMS). Grateful to our teacher Frederick A.
 6 Matsen who helped structuring the shoulder knowledge in our
 7 minds.
 8
 9 – We thank all the physiotherapists who treated our patients at the Clinique de la Jomayère (Saint Etienne- France), at the Clinique Jouvenet (Paris- France), at the Clinique de Genolier (Canton of Vaud-Switzerland) as well as in Clinique St Michel, Toulon (France).
 10
 11 – The Sarah Jackins/Matsen/Harryman shoulder recovery and rehabilitation program taught us that continuous passive motion is key for a
 12 better outcome and life after shoulder surgery.

16 Funding

17 This research did not receive any specific funding.

18 Conflicts of interest

19 The authors declare that they have no relevant financial or non-financial interests to report (Declaration and legal forms of potential conflicts of interest (COI) of Authors 1 and 2 are provided to the publisher).
 20
 21
 22

23 Data availability statement

24 Data available with the authors. As this is a descriptive review paper based on clinical experience, no individual patient was included in the study.
 25
 26

27 Author contribution statement

28 Authors 1 and 2 contributed to the conceptualization and methodology; authors 1 and 2 contributed to the writing of the original draft; authors 1 and 2 contributed to the visualization and investigation; authors 1 and 2 contributed to the supervision, writing, reviewing, and editing of the paper.
